PROFESSIONAL SUMMARY

Electronics and Communication Engineering undergraduate at Haldia Institute of Technology (CGPA: 7.57/10), focused on full-stack development and Generative AI. Builds responsive web interfaces and explores backend development, API integration, and LLM-based applications. Familiar with RAG, vector databases, LangChain, and LangGraph; seeking opportunities to apply these skills to practical software and AI projects.

TECHNICAL SKILLS

Programming: Python, C++, JavaScript
Web: HTML, CSS
Frontend: React, Tailwind CSS, GSAP
Backend: Node.js, FastAPI
Generative AI / LLMs: Generative AI, Agentic AI, RAG, vector databases, LangChain, LangGraph
Data Libraries: NumPy, Pandas, Matplotlib
Databases: MongoDB, PostgreSQL
Tools: Git, GitHub, Docker
Problem Solving: Data Structures and Algorithms using C++

PROJECTS

GitHub Profile Analyzer | React · JavaScript · GitHub API
- Developed a web dashboard to retrieve and present GitHub profile and repository information through GitHub API integration.
- Built a structured React interface for exploring developer and repository data.

Personal Portfolio Website | HTML · CSS · JavaScript · GSAP
- Designed and developed a personal portfolio to showcase technical skills, projects, and engineering interests.
- Implemented scroll-controlled animations with GSAP and ScrollTrigger to create interactive transitions between sections.
